COMMUNITY HEALTH CENTRE GUIDE

Patient Services, Appointments and Clinic Policies | 2026–2027

1. Overview

Greenfield Community Health Centre is a fictional outpatient clinic serving families, students, and local residents. The centre provides general consultations, preventive screening, vaccination appointments, basic laboratory testing, and follow-up care. It does not provide overnight inpatient care or emergency surgery.

2. Opening Hours and Appointments

The clinic operates Monday to Friday from 8:00 a.m. to 6:00 p.m. and Saturday from 9:00 a.m. to 1:00 p.m. It is closed on Sundays and public holidays. The last routine consultation begins thirty minutes before closing. Patients may book appointments by phone or through the clinic portal. Walk-in patients are accepted based on available capacity, but booked appointments receive priority.

3. Registration and Required Documents

New patients should bring a government-issued photo identification document, a current contact number, and a list of medicines they are taking. Patients using an insurance plan should also bring their insurance card and policy details. A parent or legal guardian must accompany patients under eighteen unless the clinic has documented an approved alternative arrangement.

4. Appointment Changes and Missed Visits

Patients should cancel or reschedule a routine appointment at least four hours before the scheduled time. A patient who arrives more than fifteen minutes late may need to wait or book another appointment. Three missed appointments within a six-month period may result in a requirement to confirm future appointments by telephone. Urgent symptoms should not be delayed while waiting for a routine appointment.

5. Laboratory Services

Routine blood collection is available Monday to Friday from 8:00 a.m. to 11:00 a.m. Some tests require fasting; patients must follow the instructions provided by the clinician or laboratory staff. Reports for routine tests are generally available within two working days. Specialised tests may take five to seven working days. Results are released through the secure patient portal or directly to the referring clinician.

6. Fees and Payment

A general consultation costs ■500. A follow-up consultation within seven days for the same concern costs ■250 when the clinician recommends the follow-up. A standard blood count test costs ■350, and a fasting blood glucose test costs ■180. Vaccines and specialised laboratory tests are charged separately. Payments can be made by cash, card, or supported digital payment methods. An itemised receipt is provided for each payment.

7. Prescriptions and Medication Safety

The clinic does not dispense every prescribed medicine. Patients may obtain medicines from a licensed pharmacy. Prescription refills should be requested at least two working days before the current supply is expected to run out. Staff cannot guarantee a refill without clinician review. Patients should not share prescribed medication with another person and should inform the clinician about allergies, current medicines, and any suspected adverse reaction.

8. Privacy and Medical Records

Patient records are stored in a restricted electronic record system. Access is limited to authorised staff who need the information for care, billing, or approved administration. Patients may request a copy of their records by submitting a signed request and identity verification. Standard record-copy requests are processed within seven working days. Information is not disclosed to family members or employers without appropriate authorisation, except where disclosure is required by applicable law.

9. Feedback and Complaints

Patients may submit feedback using the form at reception or by emailing feedback@greenfieldhealth.example. The administration team acknowledges complaints within two working days and aims to provide a written response within ten working days. Complaints involving immediate safety concerns are escalated to the clinic manager on the same day.

10. Urgent Situations

The clinic is not a substitute for emergency services. People experiencing severe breathing difficulty, loss of consciousness, heavy bleeding, or other potentially life-threatening symptoms should contact local emergency services or attend the nearest emergency department immediately. Clinic staff can provide basic first aid while emergency assistance is arranged when the clinic is open.

Contact Directory

Department	Service	Contact
Reception	Appointments and registration	appointments@greenfieldhealth.example
Laboratory	Routine sample collection and reports	lab@greenfieldhealth.example
Medical Records	Record-copy requests	records@greenfieldhealth.example
Administration	Feedback and complaints	feedback@greenfieldhealth.example
